1. User

The User section groups the options related to logging in and out, and credential management. From here, the user can log in, change their password, and log out. Additionally, the system displays the active role and the user's name in the status bar.

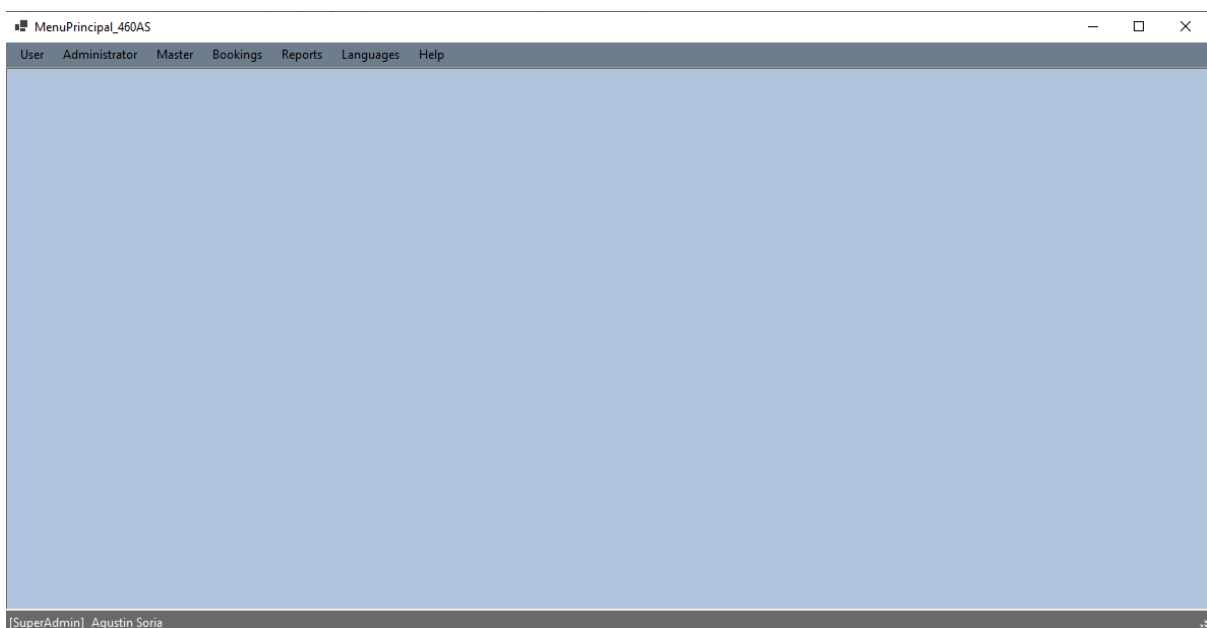

1.1 Log In

Allows entry into the system with a registered user. The username and password must be completed, and the Log In button must be pressed. If the data is correct, the menus are enabled according to the assigned profile. The bottom bar shows the role and name of the active user.

💡 If the username or password is incorrect, an error message is displayed.

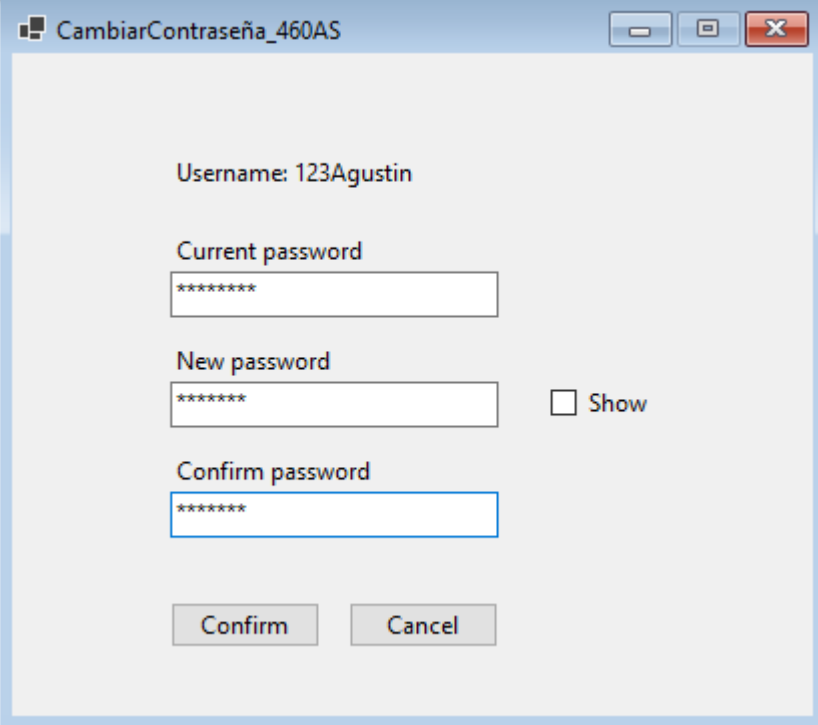

The image shows a Windows-style dialog box titled "Login_460AS". It contains two text input fields: "Username" with the text "123Agustin" and "Password" with "*****". To the right of the password field is a checkbox labeled "Show". At the bottom are two buttons: "Login" and "Cancel".

1.2 Change Password

Allows the current password to be modified with a new one. The user must enter their current password, the new one, and confirm it. The system validates the data and saves the change.

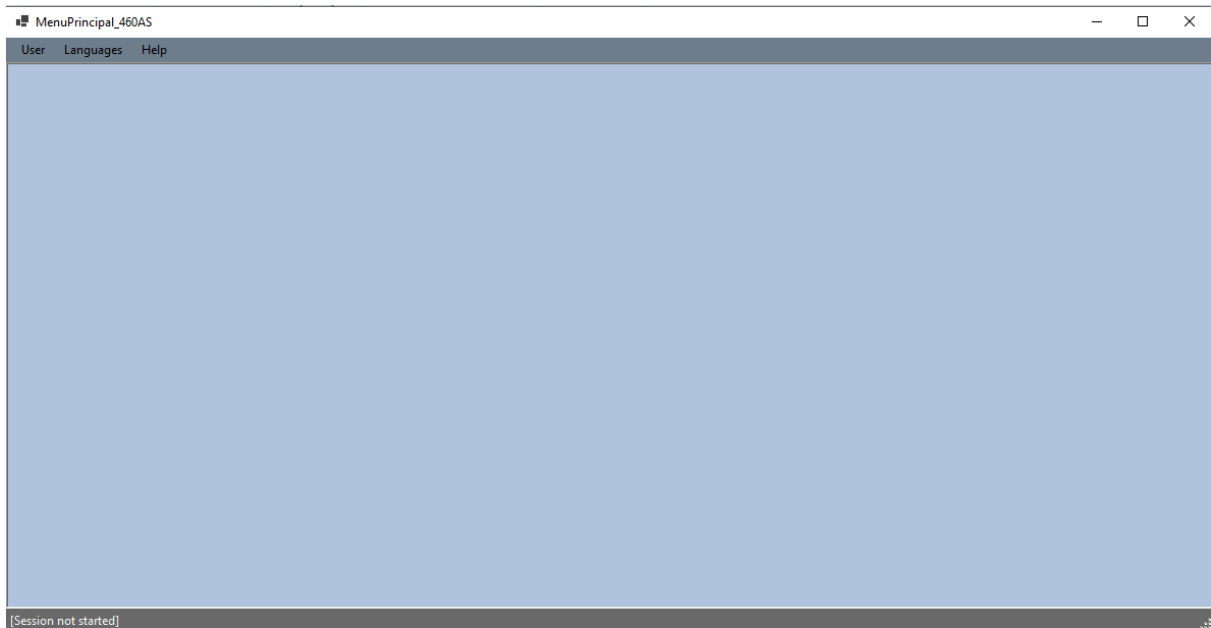

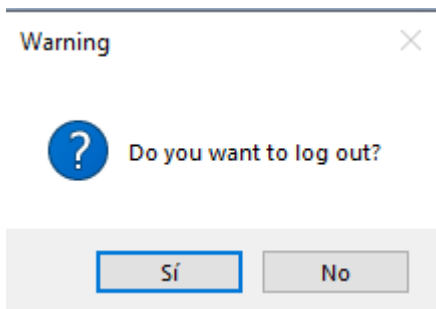

💡 It is recommended to use secure passwords and not share them.

The screenshot shows a Windows-style dialog box titled "CambiarContraseña_460AS". Inside the dialog, the text "Username: 123Agustin" is displayed. Below this, there are three password input fields, each containing seven asterisks. The first field is labeled "Current password", the second "New password", and the third "Confirm password". To the right of the "New password" field is a checkbox labeled "Show". At the bottom of the dialog, there are two buttons: "Confirm" and "Cancel".

1.3 Log Out

Ends the current session and returns the system to its initial state. Upon selecting it, a confirmation message is displayed. Once closed, the menus are disabled until a new session is started.

2. Administrator

The Administrator section groups the system management and maintenance functions. From here, the user with administrative permissions can control users, profiles, permission families, audits, and backups.

2.1 Audit Events

Allows viewing the log of actions performed by the different users of the system. It is used to track which operations were executed and when.

AuditoriaEventos_460AS

Username: Agustín Soria

Module: Clientes

Activity: Todos (Clientes)

Criticality: Todos

Start date: sábado, 8 de noviembre de 2025

End date: martes, 11 de noviembre de 2025

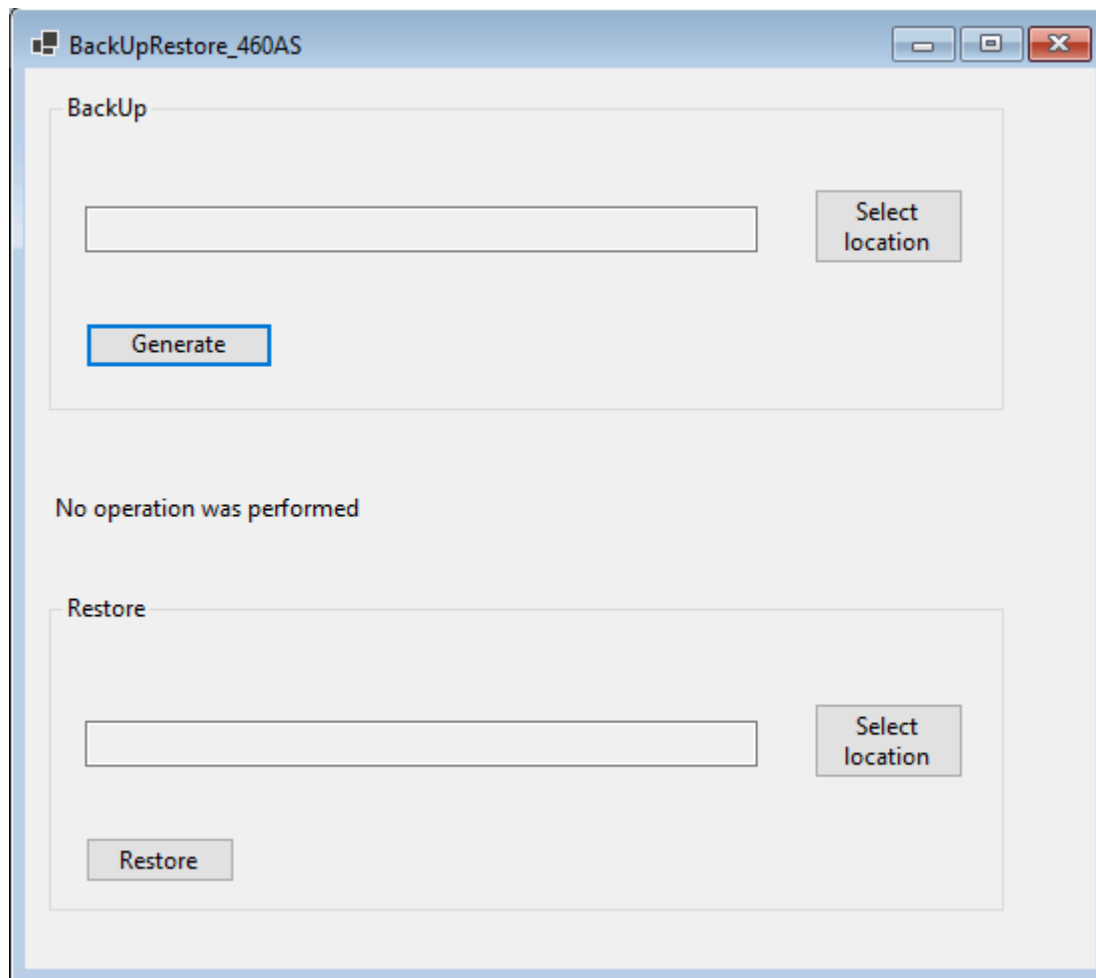

The grid displays the audit records with the user, module, activity, and criticality level.

Buttons:

- Apply: Filters the events according to the selected criteria.
- Print: Generates a PDF of the listing.
- Clear: Resets the filters and shows all events.
- Exit: Closes the screen and returns to the main menu.

2.2 Backup and Restore

Allows generating a backup copy of the database or restoring an existing one.

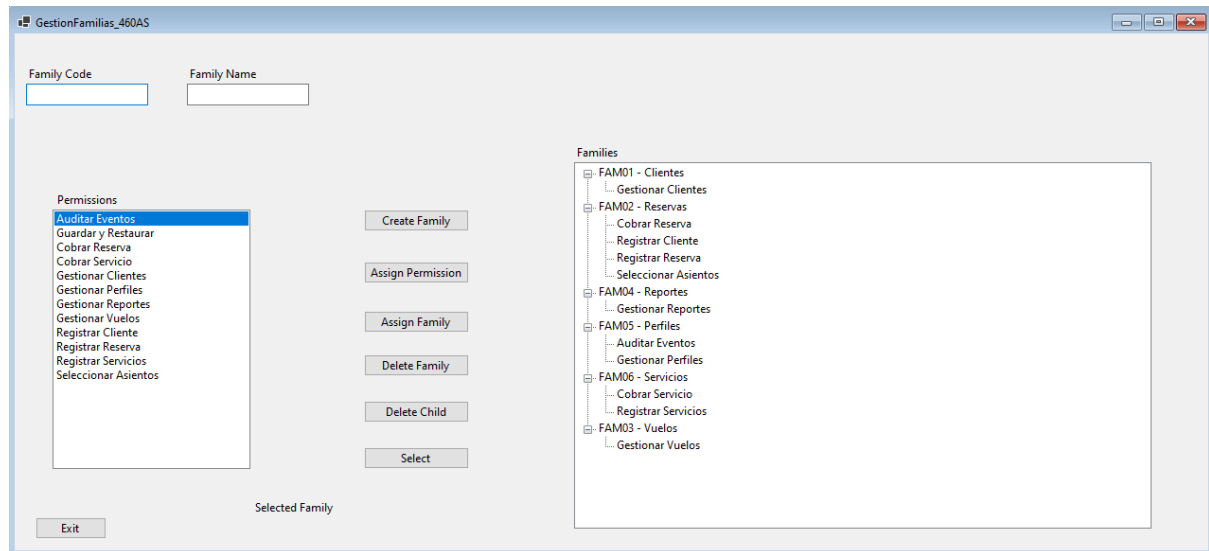

Buttons:

- Select Location (Backup): Allows selecting the folder where the backup copy will be saved.
- Select Location (Restore): Allows selecting the .bak file that you wish to restore.
- Generate Copy: Creates the .bak file with the current system data in the selected path.
- Restore: Recovers the information from the selected copy and applies it to the database.

The selected paths will be displayed in the corresponding text box.

2.3 Manage Families

Allows creating, modifying, and deleting permission families, which group different system accesses. From this screen, permissions can also be assigned to a family or child families within a hierarchy.

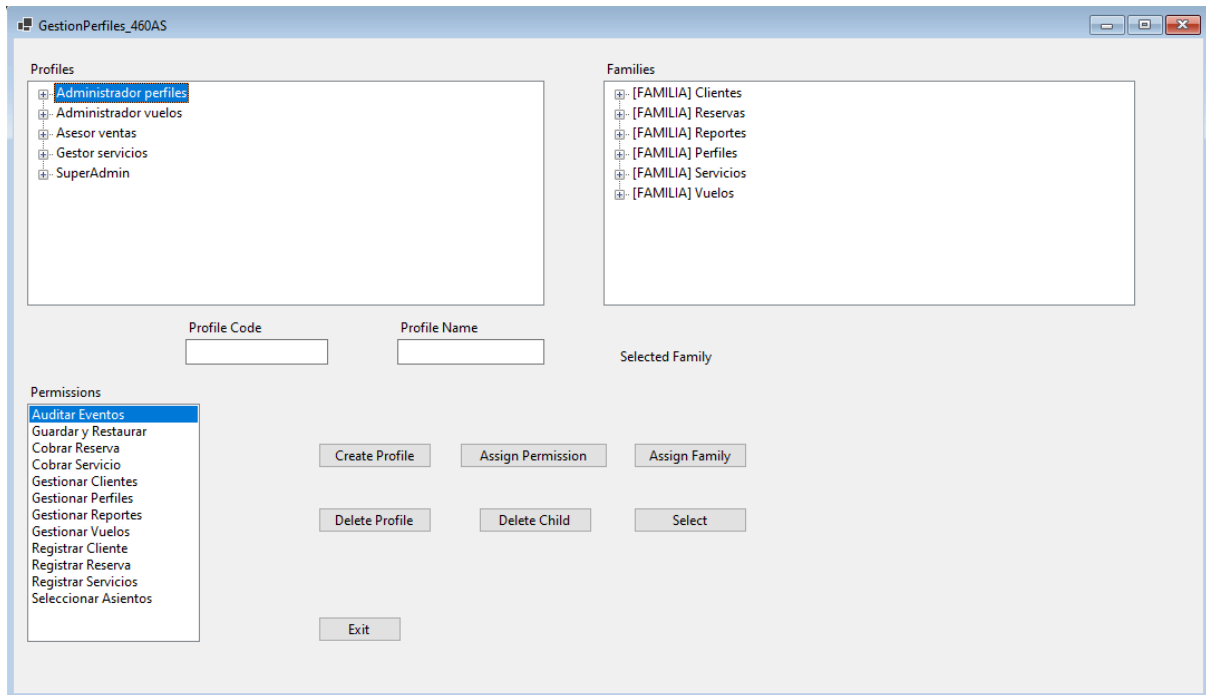

Buttons:

- **Create Family:** Registers a new family with the entered code and name.
- **Assign Permission:** Links the selected permission to the chosen family.
- **Assign Family:** Establishes a child family within another parent family.
- **Delete Family:** Deletes the selected family from the tree.
- **Remove Child:** Removes an assigned permission or child family.
- **Select:** Marks a family to be assigned as a child.
- **Exit:** Closes the screen and returns to the main menu.

2.4 Manage Profiles

Allows creating, modifying, or deleting user profiles, which determine what permissions and permission families each system user can use. From this screen, individual permissions or entire families are assigned to a specific profile.

Buttons:

- **Create Profile:** Creates a new profile with the entered code and name.
- **Assign Permission:** Adds the selected permission to the profile.
- **Assign Family:** Links an entire family of permissions to the profile.
- **Delete Profile:** Deletes the selected profile.
- **Remove Child:** Removes an assigned permission or family from the profile.
- **Select:** Marks a family to be assigned as a child.
- **Exit:** Closes the window and returns to the main menu.

2.5 Manage Users

Allows creating, modifying, deleting, or unlocking system users. From this screen, a role or profile can also be assigned to each user and their active or inactive status can be defined.

- Active: Changes the user's status (active/inactive).
- Unlock: Reactivates a user blocked due to failed login attempts.
- Exit: Closes the window and returns to the main menu.

3. Master

The Master module brings together the main data administration screens of the system. From here, clients, flights, seats, and the change audit are managed. These functions are only available to users with administrative or management permissions.

3.1 Audit Changes

Allows viewing all modifications made to client data. Each record shows the previous and updated information, along with the date of the change and the status of the client record.

AuditoriaCambios_460AS

Buttons:

- Apply: Filters the results according to the entered criteria.
- Clear: Clears the applied filters and shows all records.
- Activate: Changes the status of an old record, making it active again. By pressing Activate on the previous record, it reverts to 1, restoring the original client.
- Exit: Closes the screen and returns to the main menu.

3.2 Manage Seats

Allows managing the layout and status of the seats for each flight. From this screen, available flights and the seats associated with each one can be viewed. The upper part shows the list of flights with their code, airline, origin, destination, dates, and price. Upon selecting a flight, the corresponding seats are loaded into the lower grid, where their number, type, and status can be seen.

The screenshot shows a software window titled "GestionAsientos_460AS". It contains two main sections: "Flights" and "Seats".

Flights Table:

- Exit: Closes the screen and returns to the main menu.

3.3 Manage Clients

Allows registering, modifying, deleting, and consulting clients in the system. Each client has an ID (DNI), name, surname, date of birth, telephone, and passport number. From this screen, data can also be serialized and deserialized to save or recover information in external files. The upper grid shows the loaded clients with all their data. The lower part is where values are entered or edited, and serialization operations are performed.

Clients

	ID	First Name	Last Name	Birth Date	Phone	Passport Number
▶	12312312	Marcelo	Salas	23/06/1993	22334455	1212345678

Buttons: Add, Edit, Delete, Save, Cancel

Input fields: ID, Name, Surname, Phone, Birthdate (martes, 11 de noviembre de 2025), Passport number, Encrypted checkbox

Serialized clients, Unserialized clients, Serialize, Deserialize, Clear buttons

Buttons:

- Add: Enables the fields to enter a new client.
- Modify: Allows editing the data of the selected client.
- Delete: Logically deletes the selected client.
- Save: Confirms the changes made.
- Cancel: Cancels the current operation.
- Serialize: Converts client data into text to save it in an XML file.
- Deserialize: Reloads the serialized XML data into the system.
- Clear: Clears the serialization lists.

3.4 Manage Flights

Allows creating, modifying, and deleting flights in the system. Each flight includes its code, airline, origin, destination, departure and arrival dates, and the ticket price. This screen keeps all available flight information updated. The main grid shows the loaded flights with their corresponding data. The fields for editing or entering a new flight are located in the lower part.

4. Reservations

The Reservations module allows managing the sale and registration of air tickets for the system's clients. It includes the creation of new reservations, flight selection, and the assignment of additional services.

4.1 Register Booking

Allows creating a reservation by selecting the client, flight, and seats, and concluding with payment.

4.1.1 Enter Client

In this screen, the client's main data is entered, and Enter is pressed. Upon validating the client, the flight list is enabled.

4.2.3 Seat Change

If the client selects the Seat Change additional service, this screen opens where they can choose new available seats for the flight. The system shows the client's current seats and allows replacing them with others of Normal or VIP type, automatically updating the additional cost.

The screenshot shows a window titled "CambioAsiento_460AS". Inside, there's a table of available seats and a section for assigned seats.

Seats			Type
Numero	Tipo	Estado	<input type="radio"/> Normal <input checked="" type="radio"/> VIP
D004	VIP	Available	
E005	VIP	Available	
F006	VIP	Available	

Below the table are four buttons: "Change seat", "Confirm seats", "Clear", and "Exit".

At the bottom left, there's a dropdown menu labeled "Customer's current seats" with "B002" selected.

On the right side, there's a box titled "Assigned seats" containing the text: "Seat A001 → C003" and "Seat B002 → D004".

Below the assigned seats box, there's pricing information: "Regular seat --> 50 USD" and "VIP seat --> 100 USD".

Buttons:

- Change Seat: Assigns the new selected seat.
- Confirm Seats: Saves the changes and returns to the additional services screen.
- Clear: Clears the seat selection.
- Exit: Closes the window without applying modifications.

4.2.4 Special Meal

If the client selects the Special Meal additional service, a screen opens where they can choose the preferred menu type for the flight. Each option shows an illustrative image and its corresponding price.

Vegetarian meal

Gluten-free meal

Premium meal

Meals

<input type="checkbox"/>	Vegetarian – 20,00 USD
<input checked="" type="checkbox"/>	Gluten-free – 22,00 USD
<input type="checkbox"/>	Premium – 30,00 USD

Final price

22,00 USD

Register

Exit

Buttons:

- Register: Saves the selection and associates it with the client's reservation.
- Exit: Closes the window and returns to the additional services screen.

4.2.5 Travel Insurance

If the client selects the Travel Insurance service, a screen opens that allows them to purchase assistance coverage for the passenger according to their needs. The system offers three plans from different companies, showing their characteristics, benefits, and prices.

RegistrarSeguroViaje_460AS

Assist Card	Universal Assistance	AXA Travel Protection
Type: Premium	Type: Intermediate	Type: Basic
Luggage: full coverage	Luggage: up to 300 USD	Luggage: up to 200 USD
Assistance: medical and legal 24/7	Assistance: worldwide 24/7	Assistance: phone assistance 24/7
Price: 80 USD	Price: 55 USD	Price: 40 USD
<input checked="" type="radio"/> Premium	<input type="radio"/> Intermediate	<input type="radio"/> Basic

Expiration date: viernes, 30 de octubre de 2026

Price: 160,00 USD

Buttons: Register, Exit

Buttons:

- Expiration Date: Indicates the validity of the purchased insurance.
- Register: Confirms the purchase of the insurance for the current reservation.
- Exit: Closes the screen without saving changes.

4.2.6 Extra Luggage

If the client selects the Extra Luggage service, a screen opens that allows them to add additional luggage to their reservation, choosing the quantity and weight of each one.

RegistroValijaExtra_460AS

Quantity: [Dropdown]

Weight: [Dropdown]

Price: [Input]

Added suitcases

4 x 15 kg → 60,00 USD

Price

10 kg	--> 10 USD
15 kg	--> 15 USD
25 kg	--> 25 USD
32 kg	--> 40 USD

Buttons: Add, Register

Buttons:

- Add: Adds the selected luggage to the "Added suitcases" list.
- Register: Saves the changes and associates the luggage with the client's reservation.

4.2.7 Additional Services Summary and Payment

Once the additional services are selected and registered, the system shows a detailed summary with all the reservation information and associated charges. On this screen, the client, the flight, and the details of each added service can be verified, along with their individual price and the final total, in addition to enabling the Charge button to proceed with payment.

The screenshot displays a web application window titled "GestionServiciosAdicionales_460AS". The interface is divided into several sections:

- Client Information:** Includes fields for ID (77766655), Name (Donald), and Surname (Trump), with a "Login" button below.
- Client bookings:** A table showing booking details.

	Code	Flight	Date	Total
▶	ME642S	BRA56387	11/11/2025	480
- Additional services:** A dropdown menu currently shows "Seat change", with a "Register service" button next to it.
- Summary:** A box containing the following text:

Client: Donald Trump
Booking: ME642S
Flight: BRA56387 – Brasil

Added services:

 - Extra luggage – 60,00 USD
 - Special meal – 22,00 USD
 - Travel insurance – 160,00 USD (vence 30/10/2026)
 - Seat change – 150,00 USD

Total to pay: 392,00 USD
- Payment:** A "Pay" button is located at the bottom center.

Pressing Charge opens the Services Payment screen, where payment details are completed to confirm the transaction.

The screenshot shows a web application window titled "CobroServicios_460AS". It contains a payment form with the following fields and values:

Field	Value
Payment type	CreditCard
Card number	1234567890
Cardholder's first name	Donald
Cardholder's last name	Trump
CVV	111
Total amount	392,00 USD
Expiration date	30/12/2025

A "Confirm payment" button is located at the bottom right of the form.

Pressing the Confirm Payment button processes the payment, registers the additional services in the system, and generates a PDF voucher.

Comprobante de Servicios Adicionales

- Comida: Gluten-free (\$22)

5. Reports

The Reports module provides access to the system's generated reports, which are mainly about reservations and additional services registered in the system. These reports can be viewed on screen in a PDF.

5.1 Reservation Vouchers

Allows viewing all vouchers generated by reservations registered in the system. Each row represents a payment operation performed, showing the voucher information and the type of payment used.

The screenshot shows a window titled 'GestionReportes_460AS' with a table of receipts. The table has six columns: ReceiptCode, ReservationCode, Amount, PaymentType, and PaymentDate. The first row is highlighted in blue. Below the table is a large gray rectangular area.

	ReceiptCode	ReservationCode	Amount	PaymentType	PaymentDate
▶	KDMS4242	RK537P	110	TarjetaCredito	03/11/2025 16:21
	NFVK3947	BZ984Q	3000	TarjetaCredito	30/10/2025 16:32
	QNUS3983	PO657J	500	TarjetaDebito	30/10/2025 16:11
	WRYQ4456	ME642S	480	TarjetaCredito	11/11/2025 15:53

By double-clicking on a voucher, the system automatically opens the associated PDF, showing the complete transaction detail.

Comprobante de Pago

6. Language

The system allows changing the language of the entire interface between Spanish and English. To do this, you must go to the "Language" menu in the main menu and choose the desired option. Upon selecting a language, all button, label, and message texts are automatically updated.

7. Help

The system has a Help option available in the main menu. Upon selecting it, this manual opens in PDF format, where all the system sections and functions are described.
